A Local Company Finds New Ways of Recruiting

KeyStaff is a Florida based company that started in Palm Beach County 25 years ago. It is locally owned and operated and provides most of its services in the State of Florida. This is a company that is thinking outside the box to solve their recruiting issues. Jana Thoemke, owner of KeyStaff, says "hiring, screening, and placing employees in the right positions, is what we do. Our business is recruiting employees. We have clients throughout the State of Florida and United States, and in my 36 years in the staffing industry, we have never experienced the challenges we are facing right now. For KeyStaff, failure is not an option, our clients are counting on us, and we cannot let them down." Last month, KeyStaff unveiled their new mobile office as their latest tool in the battle of recruiting. Since then, it has been seen traveling around the State of Florida, doing job fairs at client's locations, and recruiting new employees to work for KeyStaff clients. KeyStaff is actively hiring for their Administration, Light Industrial, and Hospitality Divisions. Rich Gustke, President of KeyStaff, says "We continue to look for new ways to attract the best employees and talent for all our divisions and offices. If the employees can't get to us, we will come to them."

KeyStaff also has a Direct Hire-Professional Placement Division, called KeyTalent which focuses on placing professionals nationally in the Health Care arena as well as C level executives.
